- ✓ 4 TYPES AVAILABLE

STEEL PLANKING

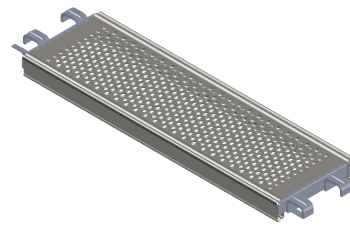

Scaffold planks are an important component to your scaffolding system as they carry your workers and the weight of your materials. ScaffSource offers four types of planks to match your existing inventory or to match the design that best suits your project.

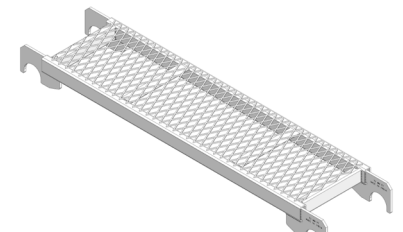

9" S Hook

9" Low Profile

12.5" Low Profile

Blast Plank

PLANK FEATURES

- The S Hook is great for planking around the verticals & other obstructions in the platforms
- The 9" profile plank series is a "drop-in" plank that sits on the bearer with minimal clearance above the ledger
- The 12.5" profile plank is available in metric and imperial sizes
- 12.5" profile planks have a 12-3/8" wide walking surface textured for a non-slip surface
- 12.5" planks can reduce the amount of plank required for a project
- Blast Planks are designed to grit blast and re-coat large surface areas without debris accumulation
